

CONTENTS OF GLACKIPR COMMISSION PROCEEDINGS, volumes 1-7*

Authors	Articles	Volume	Pages
Andrejchuk V., Galuskin E., Perşoiu A.	Cryomineral formations of Scărişoara Ice Cave (<i>abstract</i>)	7	85-86
Arkipov S., Moskalevsky M., Glazovsky A., Mayevski P., Whitlow S.	Snow cover geochemistry on the Kongsvegen Glacier and Amundsenisen (Spitsbergen)	2	7-20
Assier A., Evin M.	Cryokarst and glacial outbursts at the Chauvet Glacier (Haute-Ubaye, French Southern Alps)	3	83-87
Badino G.	Fisica del buchi nell'acqua	1	119-133
Badino G.	Ice shaft genesis: a simple numerical approach	2	21-27
Badino G.	Phenomenology and first numerical simulations of the phreatic drainage network inside glaciers	3	47-54
Badino G.	The glacial karst	5	82-93
Badino G.	La scoperta dei mulini glaciali	5	141-157
Badino G., Piccini L.	Englacial water fluctuation in moulins: an example from Tyndall Glacier (Patagonia, Chile)	5	125-129
Badino G., Piccini L.	The role of glacier stress fields on moulins geometry	6	7-12
Badino G., Romeo A.	Crio-karst in the Hielo continental sur	7	13-18
Chervyatcova O.Ya.	The glaciation of Samara region caves	7	93-97
Chevina E. V., Medkova O.N.	Fresh water investigation in Grenfiord area (Svalbard)	6	21-26
Citterio M., Turri S., Bini A., Maggi V.	Some observations on the structure and morphology of an ice deposit in the «Abisso sul Margine dell'Alto Bregai» cave (Grigna settentrionale, Italian Alps)	6	13-19
Citterio M., Turri S., Perşoiu A., Bini A., Maggi V.	Radiocarbon ages from two ice caves in the Italian Alps and the Romanian Carpathians and their significance	7	87-92
Dominguez M.C.	Software for gauging	6	27-36
Dominguez M.C., Eraso A.	Glacier discharge during 2004 in the experimental glacier catchment area Zapata sur (CPE-ZS-51°S) of glacier Tyndall (Patagonia, Chile)	7	19-26
Dominguez M.C., Eraso A.	Inverse relation between glacier discharge and conductivity in Austrelovenbreen glacier, Svalbard 79N	6	37-46
Dominguez M.C., Eraso A.	Definition of the end of discharge wave at the experimental pilot catchment area selected in the Austrelovenbreen glacier, Svalbard 79N	6	47-64
Dominguez M.C., Eraso A.	Distribution law of directional anisotropy in Kviarjökull ice tongue	5	108-110
Dominguez M.C., Eraso A., Jonsson S.	Kviarjökull glacier (Iceland): result of glaciological expeditions 1996-97-99	5	111-112
Dominguez M.C., Eraso A., Jonsson S.	Directional quantifying of anisotropy in Vatnajökull glacier (Iceland 96 and 97)	5	113-115
Dominguez M.C., Eraso A., Moskalevsky M.Yu.	First results about internal runoff estimation in subpolar glaciers	5	116-119
Dominguez M.C., Eraso A.	Glaciological investigations in the ablation area of Tyndall glacier, Patagonia	6	65-70
Dominguez M.C., Eraso A., Lluberas A.	Annual wave of glacier discharge in the Collins subpolar icecap in King George Island	6	89-107
Eraso A., Martinez A.	First results of the Greenland '90 expedition. Ilulissat and Alfred-Wegener Peninsula glaciers	1	171-184
Eraso A., Antigüedad I., Mangin A.	Time series correlogramme and spectral analysis of the Cazadora Glacier drainage and meteorological parameters, Spanish Antarctic Base (BAE), Livingston Island (South Shetland, Antarctic)	1	69-91
Eraso A.	Internal glacier melting and naled ice generated by air circulation. Proposal of an enthalpy-entropy diagram for quantitative calculations	2	29-42
Eraso A., Martinez B., Perez T., Fernandez J.	Investigations of the subglacial drainage (Grise Fiord Glacier, Ellesmere Island, Canadian Arctic)	2	43-49

Eraso A., Gavilan C.J., Perez D.	Prediction of the subglacial drainage in the marginal system of the Loven East Glacier, Ny Ålesund, Svalbard. Results of the «Svalbard 92» Spanish expedition	3	23-30
Eraso A., Badino G., Mecchia M., Gavilan C.J., Bernabei T.	Results of the main directions of subglacial drainage prediction method applied Perito Moreno Glacier. International glaciological expedition «Heilo Patagonico 95»	4	35-46
Eraso A., Dominguez M.C.	Implementation of experimental pilot catchment areas for the study of the discharge of subpolar glaciers	6	117-136
Eraso A., Dominguez M.C., Moskalevsky M.	Importance of discharge in subpolar glaciers: experimental catchment area at Collins glacier in King George Island	6	71-79
Eraso A., Dominguez M.C., Sveinn Jonsson S.	Necessary strategy to study glacier discharge continuously: pilot catchment areas implemented in Iceland	6	109-116
Eraso A., Dominguez M.C., Uuberas A.	Two year increase - summer periods of discharge at Collins glacier in King George Island	6	81-88
Eraso A., Dominguez M.C.	Hydrological year 2003/04 of discharge in Kviarjökull Glacier catchment pilot area (CPE-KVIA-64°N)	7	27-35
Filippov A.G.	The relic firn plug in the Kremenshetskaya Cave, Eastern Siberia	7	98-100
Glazovsky A.F., Jania J., Moskalevsky M. Yu.	Possibilities for studying the structure and the regime of Svalbard tide water glaciers by remote sensing methods	1	151-161
Gomez J.L.	Características del karst en hielo del glaciar Heim (Patagonia, Argentina). Predicción del drenaje subglaciar	1	163-170
Griselin M.	Les marges glacées du glacier Loven-Est, Spitsberg: un milieu original lié aux écoulements sous-glaciaires	1	35-67
Griselin M.	In the depth of a small polar glacier (Loven East Glacier, Spitsbergen)	2	51-63
Griselin M., Marlin C., Dever L., Moreau L.	Hydrology and geochemistry of the Loven East Glacier (Spitsbergen)	3	61-76
Griselin M., Marlin C.	Origin of the water circulation in the moraine plain of the Loven East Glacier (Spitsbergen)	4	61-71
Hagen J-O.	About subglacial water channels in polythermal glaciers on Svalbard (<i>abstract</i>)	6	137
Halliday W.R.	20th century glaciocaveology in the USA. An overview	6	139-143
Harbor J., Copland L., Sharp M.	Insights from artificial glacier caves: applications of borehole video to understanding the internal and basal structures of glaciers	4	55-59
Hormes A.	Holocene glacier recessions on Svalbard inferred from radiocarbon dates of mosses found in englacial meltwater channels (<i>abstract</i>)	6	145
Iken A.	Processes at the glacier base and their effect on the sliding velocity of the glacier	4	25-26
Irvine-Fynn I T.D.L., Hodson A.J., Kohler J., Porter P.R., Vatne G.	Dye tracing experiments at Midre Lovénbreen, Svalbard: preliminary results and interpretations	7	36-43
Isenko E.V., Mavlyudov B.R., Naruse R.	Natural modeling of channels in cold ice	6	147-153
Isenko E.V.	Unusual flood event in the south margin at Perito Moreno Glacier in 2004	7	44-48
Isenko E.V., Mavlyudov B.R., Naruse R.	Survival of developed intraglacial water channels in cold and temperate glaciers	7	49-53
Kadebskaya O.I.	The analysis of changes of icings of Kungur Ice Cave for the period 1985-2005 and influence factors	7	101-108
Krawczyk W.E., Pulina M.	Thermokarstic and glaciokarstic hydrology in Spitsbergen glaciers	1	185-198
Krawczyk W.E.	Chemical characteristics of water circulating in the Werenskiöld Glacier (SW Spitsbergen)	2	65-80
Krawczyk W.-E., Leszkiewicz J.	An attempt to model outflow from the Werenskiöld Glacier basin (SW Spitsbergen)	3	55-60

Laurent R.	Jean Corbel et le karst en régions polaires, en haute montagne, en climat océanique froid: orientation bibliographique	3	115-119

INDEX
(number – volume)

GLACIER CAVES AND GLACIAL KARST**Investigations**

- Air flows in cavities – 1
- Borehole video – 4
- Channels in polythermal glaciers – 6
- Cold and temperate glaciers caves – 6
- Development of intraglacial water channels – 7
- Geometry of englacial conduits – 6
- Glacier caves origin – 4
- En- and subglacial drainage origin – 3
- Ice deformation – 3
- Internal glacier melting – 2
- New type of englacial channels – 7
- Sliding velocity of the glacier – 4

Theories

- Ice physics - 1
- Physics of englacial and subglacial drainage – 4
- Theory of glacial karst – 5, 7

Biology

- Fungal life in glaciers – 6
- Radiocarbon dates of mosses – 6

History (5)

- Friedrich Simony – 4
- Jean Corbel – 3
- Notes from the past – 4
- Pleistocene glaciation – 1, 7

Models

- Ice shaft genesis – 2
- Influence of glacier stress fields on moulins – 6
- Natural modeling of channels – 6
- Phreatic drainage network inside glaciers – 3

Regions:**Franz Josef Land (3)**

- Spitsbergen (1, 3, 5)**
- Aldegonda Glacier – 6
- Fridtjovbreen – 6
- Hans – 1, 3, 4
- Loven-Est Glacier – 1
- Werenskiold Glacier – 1

Greenland (3, 5, 6)**Iceland**

- Kviarjökull – 5
- Vatnajökull – 5

Canada

- Grise Fiord Glacier – 2

USA (6)**Alps**

- d'Argentièrre Glacier – 2, 3
- Chauvet Glacier – 3
- Forni Glacier – 4
- Gornergletscher – 3, 5
- Mer de Glace – 3

Caucasus

- Bashkara Glacier – 7

Tien-Shan (1)

- Iniltcheck – 3, 5

Pamir

- Medvezhij Glacier – 1

South Tibet

- Kangware Glacier – 2

Patagonia (7)

- Heim Glaciär – 1, 2, 3, 4
- Perito Moreno – 7
- Tyndall Glacier – 5, 6

Antarctica

- Cazadora Glacier – 1
- King George Island ice sheet – 4
- Lange Glacier – 6
- Terra Nova Bay – 5
- Collins subpolar icecap – 5, 6

SNOW CHEMISTRY**Spitsbergen**

- Kongsvegen Glacier and Amundsenisen – 2

GLACIAL HYDROLOGY

- Experimental pilot catchment areas – 6
- Dye tracing experiments – 7
- Hydrology of glaciers – 1
- Lake expansion – 7
- Relation between glacier discharge and conductivity – 6
- Software for gauging – 6
- Water chemistry – 2, 3

Spitsbergen

- Austrelovenbreen – 3, 6
- Grenfiord area – 6
- Werenskiold Glacier – 2, 3

Iceland (6)

- Kviarjökull – 7

Himalayas

- Imja Glacier – 7

Patagonia

- Perito Moreno Glacier – 4
- Tyndall Glacier – 7

Antarctica

- Collins glacier – 6

PERMANENT ICE IN CAVES

- Bottom ice melting – 7
- Changes of icings – 7
- Continental glaciation and karst evolution – 7
- Ice chapel – 4
- Karst hydrology in permafrost – 2
- Preservation and reconstruction of cave glaciation - 7
- Radiocarbon ice age – 7

Regions:

- Austria* – 4
- Canada* – 3
- Italy* – 6, 7
- Romania* – 7
- Russia:*
- Arkhangelsk region – 7
- Irkutsk region – 7
- Perm Regions – 7
- Samara region – 7
